

September 30th Scrum Meeting

Attendees: Omkar, Prashaant, Khushi, Ben

Type of Meeting: Sprint Planning Meeting

Key Points:

→ Decided to use the movie dataset to create a movie review platform.

- + Users with an account will be able to review movies, search for movies, filter movies, like/dislike movies and add movies to their watch lists, and create multiple personal saved lists
- + Users without an account can browse the website but do not have the permissions of users with an account
- + The review comments will have an upvote system
- + Admins will be able to add/remove movies, add/remove comments, and institute penalty points and relative punishments (ex. 5 points = 1 day ban)

→ Discuss software requirements

◆ **Non functional requirements**

- + Application should support 50 users trying to make the same transaction at the same time
- + The app should support 100 users at once with no degradation to performance
- + The app should be able to support at least 250 users in total (including users logged in and offline)
- + All passwords will be encrypted before they are stored
- + Each user should only be able to write one review per movie
- + Admins will be able to remove any comments that violate Community Guidelines, and apply penalty points, and apply punishments
- + Application should work on any web browser
- + Any main feature should be within 3 buttons (searching movies and navigating accounts, etc.)

◆ **Functional Requirements**

- + Users will be able to
 - + Create an account
 - + Log in with valid credentials/ log out
 - + Search and filter movies
 - + Like/dislike movies
 - + Keep multiple saved lists of movies
 - + Add/ Delete/Edit reviews on the movies
- + Admins will be able to
 - + Regulate penalty points to users for violations
 - + Add/ Remove movies
 - + Regulate comments made by general users
 - + User moderation

◆ **Domain Requirements**

- + The users must login before they access personalized features or comment
- + The users that don't login can only browse without being able to do anything else
- + Every user can only submit one review per movie, they can edit or delete and rewrite that comment later on
- + A movie can be saved in multiple lists but only once in a particular list

◆ **Assigning work to each of the members**

- + Omkar will create the traceability matrix
- + The rest of us will create user stories in the backlog

Team member contribution:

Omkar: 25%, Prashaant: 25%, Khushi: 25%, Ben: 25%

→ **Project Backlog**

- + Put all user stories here
 - + Ben
 - + Prashaant
 - + Khushi
- + Traceability Matrix
 - + Omkar
